

Advance Your Understanding. Live Cell Imaging Tools.

CELLESTIAL[®] Live Cell Analysis

High-Specificity with Enzo's CELLESTIAL[®] Cellular Analysis probes and dyes

Our CELLESTIAL[®] portfolio of fluorescent probes and assay kits for cellular analysis provides a complete set of tools for monitoring cell viability, proliferation, death, oxidative stress and toxicology on flow cytometry, microscopy and microplate platforms. Our assays, probes and bright dyes are optimized for the most demanding imaging applications, where consistency and reproducibility are essential.

CYTO-ID[®] Autophagy detection kit

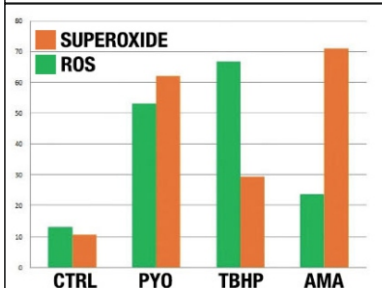

A no-transfection assay for monitoring autophagy

Fluorescent Microscope

ROS-ID[®] Total ROS/Superoxide detection kit

Accurately profile Total ROS and Superoxide with dual-readout assay

Fluorescent Microplate Reader

NUCLEAR-ID[®] Red DNA Stain

Brighter cell permeable DNA stain

Flow Cytometer
