

OneStep ELISA kit

OneStep ELISA kits generate data in just 90 minutes with just one washing step and accurate quantitation

Monoclonal Ab

A monoclonal antibody (mAb or moAb) is specific to a single epitope within an antigen. Monoclonal antibodies have low non-specific cross-reactivity and minimal lot-to-lot variations. BT LAB offers highly validated monoclonal antibodies for your research.

Recombinant protein

Proteins that can result from the expression of recombinant DNA within living cells are termed recombinant proteins. BT LAB offers a selection of recombinant proteins.

Biochemicals

Find your assay tools to analyze glycolysis, fatty acid metabolism, oxidative stress.

Cancer

BT LAB offers a variety of tools for studying many areas of cancer research including signal transduction, apoptosis, angiogenesis, cell adhesion etc.

Immunology

BT LAB offers a variety of tools for studying many areas of cancer research including signal transduction, apoptosis, angiogenesis, cell adhesion etc.
