

A complete portfolio of DNA stabilization, DNA purification, and DNA clean-up products for the simple and rapid recovery of high-yield, inhibitor-free DNA from any sample.

DNA Purification

Plasmid Purification

Clean-up/DNA Fragment Purification

Automated / High-throughput

DNA Analysis

Quick-DNA Kits

DNA
The Quick-DNA Plus Kits are the easiest DNA isolation kits for high yield DNA isolation from any cells, tissues, and biological fluids.

ZymoPURE Plasmid Kits

Plasmid Purification
ZymoPURE Plasmid kits are the fastest and simplest plasmid kits available to efficiently isolate transfection-grade plasmid DNA from E. coli.

DNA Clean & Concentrator Kits

DNA
DNA Clean & Concentrator Kits are PCR purification kits that provide PCR purification of up to 500 µg of DNA from PCR, endonuclease digestions, DNA modification reactions, isotope/fluorescence labeling reactions, etc.

ZymoBIOMICS DNA Kits

Microbiomics
The ZymoBIOMICS DNA Kits are microbial DNA purification kits designed for purifying DNA from a variety of sample inputs that is immediately ready for microbiome or metagenome analyses.

MAGicBead™ cfDNA Isolation Kit

D4086
Novel DNA binding chemistry enabling unparalleled cfDNA extraction performance

Zymoclean Gel DNA Recovery Kits

DNA
Gel DNA extraction kits that provide highly efficient DNA purification from agarose gels.

Zyppy Plasmid Kits

Plasmid Purification
The Zyppy Plasmid Kits are plasmid DNA kits that provide pellet-free high-quality plasmid DNA in only 8 minutes.

Genomic DNA Clean & Concentrator (gDCC)

DNA
The Genomic DNA Clean & Concentrator kits are gDNA clean up kits that provide quick clean-up of large-sized DNA in just 5 minutes.

Quick-DNA Fecal/Soil Microbe Kits

DNA
The Quick-DNA Fecal/Soil Microbe kits are affordable fecal and soil DNA extraction kits for fast, easy isolation of inhibitor-free, PCR-quality...

Quick-DNA Fungal/Bacterial Kits

DNA
Easily and quickly isolate total DNA from tough-to-lyse fungi and bacteria.

OneStep PCR Inhibitor Removal Kits

DNA
PCR inhibitor clean up kits that contain all the components needed for efficient removal of potent PCR inhibitors - all in one step.

Select-a-Size DNA Clean & Concentrator Kits

DNA
The fastest and easiest size selection DNA kits to purify specific ranges of DNA fragments from PCR, endonuclease digestions, ligations, library...
