

Biomatik has been proudly serving life sciences since 2002. We primarily focused on Biochemicals, Enzymes, Gene Synthesis, and Peptide Synthesis services in the early years, but have since rapidly expanded our offerings to include ELISA Kits, Protein Production, Antibody Production and Antibody Sequencing Services. Biomatik works closely with its partners at the R&D and production levels, along with 35+ distributors in the world. To date, in addition to our catalog products, Biomatik has delivered 72,000+ custom made products to our researchers worldwide.

31,000+ ELISA Kits

- High sensitivity and low detection range: Our lowest detection ranges are in the picogram range (1-100pg/mL, 3-200pg/mL).
- A wide range of sample types: Serum, plasma, tissue homogenates, cell lysates, cell culture supernatants, and other biological fluids.
- Enhanced specifications: Some of our kits feature a shortened experimental time, pre-diluted detection reagents, and enhanced stability.
- Customer support: Thorough technical support - we stand behind our products and assist our customers promptly whenever the need arises.

Catalog Products
31,000+ ELISA Kits
14,000+ Antibodies
17,000+ Proteins
230+ Biochemicals

Bioreagents

- High quality Bioreagents at highly competitive prices.
- Customer support: Thorough technical support - we stand behind our products and assist our customers promptly whenever the need arises.

Custom Services
Gene Synthesis
Peptide Synthesis
Protein Expression
Antibody Production
Antibody Sequencing

Gene Synthesis

- 18+ years in gene synthesis service
- 100% sequence accuracy guarantee
- Highly competitive - start from \$0.15/bp
- Fast turnaround time: 2-3 weeks for normal genes under 2kb

Biomatik has been proudly serving the life sciences and drug discovery community since 2002. To date, in addition to our catalog products, Biomatik has delivered 72,000+ custom made products to our researchers worldwide.

Peptide Synthesis

- 16+ years in peptide synthesis
- From Milligrams to Kilograms, with a wide range of modification service
- High competitive - as low as \$3/AA or \$80/peptide
- Fast turnaround time: 2-3 weeks for purified peptides under 30aa

Protein Expression & Purification

- Risk-free E. coli packages: No Protein, No Charge!
- >95% success rate in E. coli expression system
- Tag free expression available - no trace of the affinity tag since no tag removal involved in production
- Fast turnaround time: as fast as 4-6 weeks

Antibody Production

- Applications guaranteed packages available.
- From antigen design, peptide or protein production to antibody production
- Fast turnaround time: as fast as 4-6 weeks

Antibody Sequencing

- >95% success rate for human/mouse/rat IgG antibody sequencing.
- Standard deliverables include antibody sequencing data, 1mg recombinant antibody (>90%) with antibody affinity guarantee by ELISA.
- Risk-free guarantee: We guarantee antibody sequencing result AND antibody binding affinity by ELISA for the produced recombinant antibody. Otherwise, it is free of charge.
- Fast turnaround time: 6-8 weeks including antibody sequencing, recombinant antibody expression and purification, ELISA binding detection.
