WORLD CLASS ACCURATE AND RELIABLE RESULTS

Accurate and reliable results are critical when taking a scientific concept from bench-to-bedside. We support all levels of research with high-quality ELISAs. ELISA kits are widely used for the detection of an antigen in a sample. The sandwich ELISA utilizes two antigen specific antibodies; one capture antibody bound to a solid phase and one enzyme-linked detection antibody. All Mercodia ELISA kits use a direct enzyme conjugation of the detection antibody, which ensures an easy-to-use protocol and a sensitive assay.

Mercodia will offer customers products and services with well-defined quality and high precision of delivery. Mercodia can offer customers:

- ▶ Immunoassay kits (IVD and RuO)
- ▶ Assay development
- ▶ Manufacturing services
- ▶ Sample analysis services
