

ELISA Kits

ELISA kits are a quick, convenient, and accurate research tool for the detection of targets of interest in cultures and samples. Because of their exceptional advantage, ELISA kits are used in many important research areas, including cancer, cardiovascular, cell biology, epigenetics, metabolism, immunology, neuroscience, signal transduction, etc. CUSABIO has 18+ years of experience in manufacturing ELISA kits and has formed a sound platform for the development of ELISA kits. As a trustworthy ELISA kit supplier, we offer 4000+ ELISA test kits mainly in sandwich ELISA format, including 3000 targets, covering species of human, mouse, rat, bovine, etc. As your partner in biological research, we completely understand the hardships of your work, and we try our best support to your research by optimizing every detail of our products and service.

"Awarded to the fastest growing supplier within a specific product category
greatest increase in the number of citations"

• 8 Key Quality Control Standards

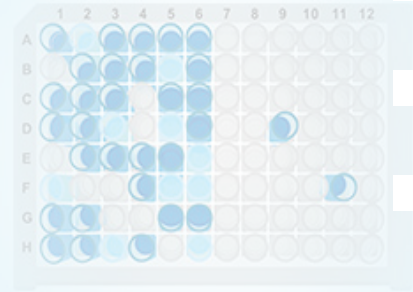

CUSABIO ELISA kits are ready-to-use ELISA kits with complete reagents, strict quality control, and validated performance. During the development process, multiple stringent steps are taken to ensure the outstanding quality of the kits, guaranteeing the products provided to customers have high standards in terms of linearity, specificity, stability, and sensitivity.

- 01 Detection Range
- 02 Specificity
- 03 Lower Detection Limit
- 04 Linearity
- 05 Recovery Rate
- 06 Accuracy
- 07 Stability
- 08 Natural Sample Validation

CUSABIO ELISA kits can detect various biological samples, including serum, plasma, body fluids such as urine, cell culture supernatants, and cell/tissue lysates.

• **Ready for Research Use**

Each ELISA kit contains a plate coated with antibodies and ready-to-use reagents. Simple operation, no special handling is required.

For sandwich ELISA

• **27,000+ Published Publication**

CUSABIO ELISA kits are trusted by thousands of researchers worldwide and have been cited in many prestigious high-impact journals, such as Nature, Science, Cell, Immunity, Nature Medicine, Cell Metabolism, Gastroenterology, etc.
