

Advancing ADC Development: Tailored Solutions for Pre-clinical and Clinical

With the advent of novel conjugation technologies and drug structures, the study of Antibody-Drug Conjugates (ADCs) has become a highly complex and challenging field.

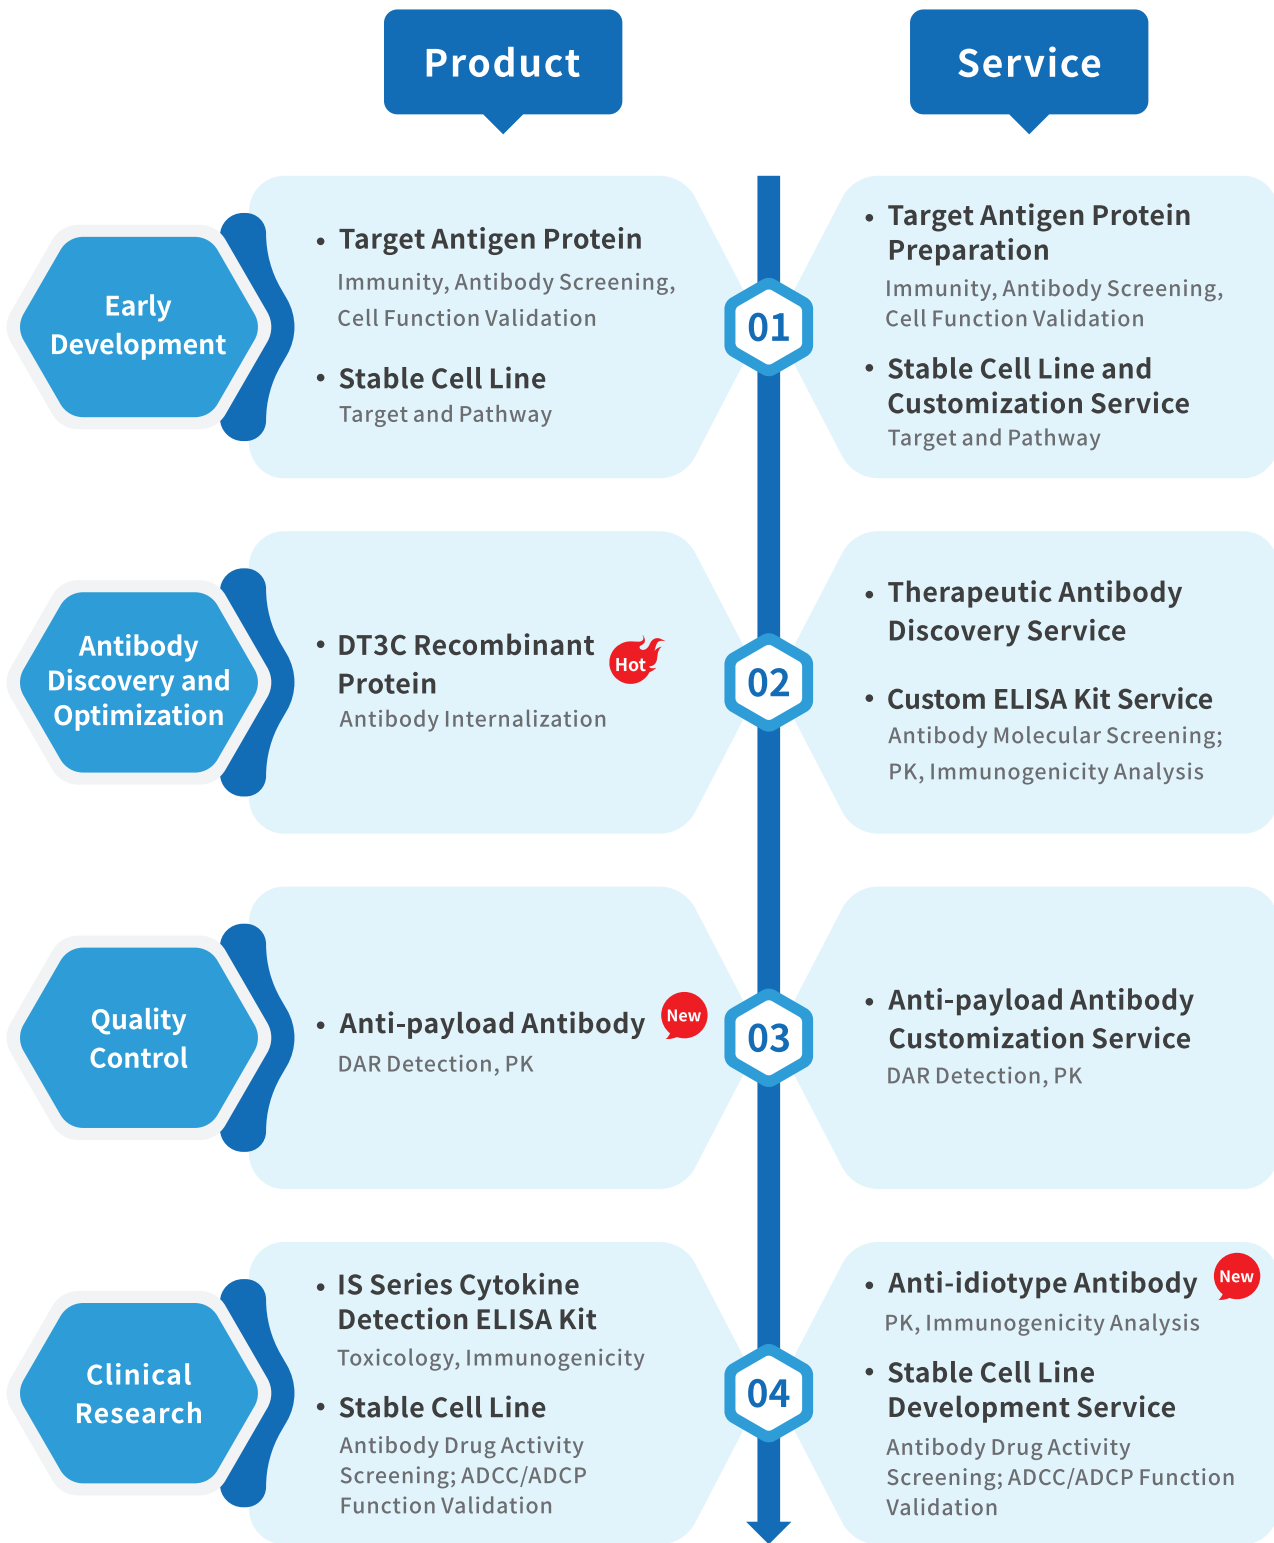

CUSABIO has 17 years of experience in protein, antibody, and ELISA kit developments, enabling us to provide bespoke products, services, and solutions tailored to our clients' specific needs at critical stages such as target selection, antibody discovery and optimization, quality control, and clinical research in ADC drug development.
